

Benjamin Louis Ameye

Grosse Pointe, MI • 313-348-1518 • benameye@gmail.com • [LinkedIn](#) • [GitHub](#)

EDUCATION

Lawrence Technological University *Southfield, MI*

B.S. Computer Science • GPA: 3.5+ *Expected May 2027*

Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Software Design, Web Architecture & Design, Discrete Structures, Probability & Statistics

TECHNICAL SKILLS

Languages: C++, Python, Rust, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React, Flask, spaCy, Hugging Face Transformers, Discord API, Microsoft Graph API

Tools & Platforms: Git, Docker, AWS, Google Cloud Platform, CI/CD Pipelines, Unix/Linux, VS Code

WORK EXPERIENCE

Office Assistant | Dr. Hernandez Internal Medicine *2023 – Present*

Primarily clerical and IT support; independently designed and built internal software tools to automate office workflows.

- Identified a gap in data protection and proposed and implemented a NAS backup system for patient records, now used for ongoing server file backups
- Designed and deployed an automated fax/email sorting and printing tool integrated with Microsoft Outlook, reducing daily staff processing time 75% (~20 min → ~5 min/day)
- Built a Python-based medical record parser using pytesseract OCR and the Microsoft Graph API to extract fields from incoming faxes and auto-sort records by office-defined priority
- Handle EMR data entry and general workstation/IT support

Software Engineering Intern | Office Medicine *May 2024 – Aug 2024*

- Developed a Python package integrating the OpenAI ChatGPT API into Office Medicine's software, allowing users to query drug codes, generic medication alternatives, and clinical information with structured HTML-formatted responses; packaged for internal integration
- Authored a comprehensive README and usage documentation for developer adoption and deployment

PROJECTS

AI Resume Scoring Web Application | Capstone Project • Python, Flask, React, spaCy, Transformers, CI/CD *2024 – 2025*

- Architected and implemented a full-stack web application that parses resumes and evaluates them against job descriptions using NLP techniques including tokenization, keyword extraction, and semantic similarity via Hugging Face Transformers
- Built a Flask REST API backend and a React frontend; deployed the application with a CI/CD pipeline for automated testing and continuous delivery
- Served as Scrum Master for Sprint 3, adjusting sprint scope around a holiday break while maintaining team accountability; independently implemented the majority of production code across the development phase while teammates handled documentation
- Led the full development phase as primary engineer, translating UML class diagrams and database models (Visual Paradigm) into production code

Video Aspect Ratio CLI (vidstretch) | Rust *2025 – Present*

- Built a Rust CLI (github.com/ameyeben/vidstretch) that batch-processes video aspect-ratio conversion via a parallel wrapper around FFmpeg — includes a bounded worker pool for concurrent jobs, glob/recursive file discovery, interactive conflict resolution, and JSON reporting
- Prioritized performance by building on FFmpeg's optimized scaler rather than reimplementing transform math, focusing custom engineering on concurrency, UX, and reliability

Personal Portfolio Website | JavaScript, HTML/CSS, Google Cloud Platform *In Progress*

- Designing and building a full-stack personal portfolio site to showcase projects and experience; managing hosting on Google Cloud Platform with Git-based version control

Team Maker Discord Bot | Python, Discord API *2023*

- Built a Discord bot for reaction-based team formation using multiple team-assignment algorithms

CERTIFICATIONS

- Google Cybersecurity Professional Certificate V2 — Google (Coursera)
- AWS Educate: Machine Learning Foundations — Amazon Web Services
- Introducing Generative AI with AWS — Amazon Web Services

ACTIVITIES & ACCOMPLISHMENTS

- Founded and organized a summer software developer group to collaborate on projects and share technical knowledge
- Participated in two collegiate hackathons; Varsity Soccer — 2x All-District, All-Conference, District Champion
